- **Outputs:** are the direct products of program activities, for example, the number of hours participants attended a program. Outputs are typically observed/measured in the short-term.
- **Outcomes:** are the changes that a program aims to make, and go beyond direct outputs that result from program activities.
- **Impacts:** is the fundamental intended and unintended change that occurs as a result of program activities. Impact can be understood as the sum of the outcomes. Impacts are typically observed/measured over a longer time scale.
