

For release: 11:30am, 3 August 2009

Job advertisements still soft in July

Highlights

- Job ads on the internet and in newspapers fell by 1.7% in July, taking the annual fall to 51.9%.
- Newspaper job ads fell by 0.4%, while internet job ads dropped by 1.8%.
- Job advertisements are showing tentative signs of stabilisation, which implies that business is no longer cutting back hiring intentions at the same pace.

Total job advertisements

The ANZ Job Advertisements Series released today showed the total number of jobs advertised in major metropolitan newspapers and on the internet fell by 1.7% in July to a weekly average of 125,207 per week. This follows a fall of 6.7% in June. The total number of job advertisements in July was 51.9% lower than 12 months earlier. In trend terms, the total number of job advertisements fell by 3.5% in July, following a 4.6% fall in June, to be 52.6% lower than 12 months earlier. (See Table 1)

Newspaper job advertisements

The number of job advertisements in major metropolitan newspapers decreased by 0.4% in July to an average of 8,162 per week. This follows a 0.9% rise in June. Newspaper advertisements are now 48.4% lower than in July 2008. In trend terms, the number of newspaper job advertisements fell by 1.2% in July to be 51.4% lower than a year ago. (See Table 2)

Newspaper job advertisements were mixed across the states in July. New South Wales (14.8%) experienced the largest fall in percentage terms, followed by the ACT (5.4%), the Northern Territory (3.3%), South Australia (2.1%) and Western Australia (0.9%). Meanwhile there were rises in Tasmania (19.9%), Victoria (15.4%) and Queensland (4.6%). (See Table 3)

Internet job advertisements

The number of internet job advertisements fell by 1.8% to average 117,046 per week, and were 52.1% lower than 12 months earlier. In trend terms, internet job advertisements fell by 3.6% in July to be 52.7% lower than in July 2008. (See Table 4)

ANZ Head of Australian Economics Warren Hogan, said:

- ANZ job advertisements fell by 1.7% in July, marking the fifteenth consecutive monthly decline. The annual pace of decline continued to intensify to minus 51.9%, with job advertisements now down 54.2% since employment peaked in April 2008.
- The data provides further evidence that demand for labour in the Australian economy is still wallowing at recessionary levels. So far, the difference between the current downturn and a recession however has been that weak demand for labour has not translated into

widespread labour shedding, with most employers choosing to cut back on staff working hours rather than reducing overall headcount. Indeed, the main driver of increasing unemployment has been rapid growth in the labour force due to strong population growth and high levels of participation.

- Somewhat encouragingly however, the trend pace of decline in job ads has eased for the past five months, a tentative sign that job ads may soon stabilise and that businesses may stop cutting back on hiring intentions.
- This will unfortunately be insufficient to prevent job shedding in the near term, with employment expected to contract moderately through the remainder of 2009. ANZ expects employment to fall by 18,000 in July and the unemployment rate to rise to 6.1% when the ABS releases the Labour Force report on Thursday.
- However we are increasingly optimistic that the pace of decline in employment will not be as severe as envisaged six months ago. Australian economic activity has been remarkably resilient in recent months, particularly for our largest employer, the retail sector. Furthermore, the recent rebound in business confidence and conditions suggests that employers may not be as pressed to cut back on labour (and investment) costs. We now expect the Australian unemployment rate to peak at around 7.5% in mid 2010.
- Australia's economic recovery will remain very fragile until the unemployment rate peaks. Nevertheless, RBA Governor Glenn Stevens last week refused to rule out interest rate increases prior to this occurring. As such, we expect the RBA to keep rates on hold and to soften or remove its bias for further rate cuts when the Board meets on Tuesday.

Next release: August 2009

Expected release date: Monday 7 September 2009

Note for editors:

For some of the newspapers surveyed, the ANZ Job Advertisements series counts the number of advertisement 'bookings'. Each 'booking' may contain multiple advertisements. In addition, the ANZ series counts classified advertisements only, and does not include display advertisements. For these reasons, it would be incorrect to draw any inference or correlation from the ANZ series regarding advertising volumes or revenues from employment advertising in the newspapers surveyed. The ANZ series is not intended to, and should not, be used to assess the financial performance of any of the newspapers included in it.

(a) The trend estimates have been derived by applying a 13-term Henderson moving average to the seasonally adjusted series. While this smoothing technique enables estimates to be produced for the latest month, it does result in revisions to the most recent six months as additional observations become available.

The internet series counts the average number of advertisements carried by each of the sites contributing to the series on the same day of each week in the month indicated. The day (which is not necessarily the same for each site) is selected by the site operator as broadly representative of its activity levels. The above data are based on information provided by the operators of the following sites: Seek.com.au; Hudson Global Resources; and the Department of Employment and Workplace Relations (DEWR) Australian Job Search site, jobsearch.gov.au.

This document ("document") is distributed to you in Australia and the United Kingdom by Australia and New Zealand Banking Group Limited ABN 11 005 357 522 ("ANZ") and in New Zealand by ANZ National Bank Limited ("ANZ NZ"). ANZ holds an Australian Financial Services licence no. 234527 and is authorised in the UK by the Financial Services Authority ("FSA").

This document is being distributed in the United States by ANZ Securities, Inc. ("ANZ S") (an affiliated company of ANZ), which accepts responsibility for its content. Further information on any securities referred to herein may be obtained from ANZ S upon request. Any US person(s) receiving this document and wishing to effect transactions in any securities referred to herein should contact ANZ S, not its affiliates.

This document is being distributed in the United Kingdom by ANZ for the information of its market counterparties and intermediate customers only. It is not intended for and must not be distributed to private customers. In the UK, ANZ is regulated by the FSA. Nothing here excludes or restricts any duty or liability to a customer which ANZ may have under the UK Financial Services and Markets Act 2000 or under the regulatory system as defined in the Rules of the FSA.

This document is issued on the basis that it is only for the information of the particular person to whom it is provided. This document may not be reproduced, distributed or published by any recipient for any purpose. This document does not take into account your personal needs and financial circumstances. Under no circumstances is this document to be used or considered as an offer to sell, or a solicitation of an offer to buy.

In addition, from time to time ANZ, ANZ NZ, ANZ S, their affiliated companies, or their respective associates and employees may have an interest in any financial products (as defined by the Australian Corporations Act 2001), securities or other investments, directly or indirectly the subject of this document (and may receive commissions or other remuneration in relation to the sale of such financial products, securities or other investments), or may perform services for, or solicit business from, any company the subject of this document. If you have been referred to ANZ, ANZ NZ, ANZ S or their affiliated companies by any person, that person may receive a benefit in respect of any transactions effected on your behalf, details of which will be available upon request.

The information herein has been obtained from, and any opinions herein are based upon, sources believed reliable. The views expressed in this document accurately reflect the author's personal views, including those about any and all of the securities and issuers referred to herein. The author however makes no representation as to its accuracy or completeness and the information should not be relied upon as such. All opinions and estimates herein reflect the author's judgement on the date of this document and are subject to change without notice. No part of the author's compensation was, is or will directly or indirectly relate to specific recommendations or views expressed about any securities or issuers in this document. ANZ, ANZ NZ, ANZ S, their affiliated companies, their respective directors, officers, and employees disclaim any responsibility, and shall not be liable, for any loss, damage, claim, liability, proceedings, cost or expense ("Liability") arising directly or indirectly (and whether in tort (including negligence), contract, equity or otherwise) out of or in connection with the contents of and/or any omissions from this communication except where a Liability is made non-excludable by legislation.

Where the recipient of this publication conducts a business, the provisions of the Consumer Guarantees Act 1993 (NZ) shall not apply.
