ANZ’s Asia Strategy

ANZ has an opportunity to build a high-growth core banking business to take advantage of the prospective growth rates in Asia. Ultimately our aim is to build Asia-Pacific as the third core geographic franchise in addition to consolidating our position in its domestic markets of Australia and New Zealand, and to advance our position as Australia’s leading bank in Asia, building on our existing presence and long experience in the region.

Why Asia?

The developing countries in Asia are likely to have 2-3 times the economic growth of OECD countries and much higher than our domestic markets and even higher rates of growth in financial services. With Australia’s increasing economic and political interdependence with Asia, this presents a natural expansion opportunity for a highly capable bank like ANZ.

Shareholders can invest in Asia and ANZ separately. What they cannot currently invest in is an Asian financial institution with ANZ inside. That, in addition to our traditional Institutional regional franchise, is what ANZ will offer investors.

While the return on risk is favourable, it is equally recognised that the risk of Asia is likely to be higher than Australia’s, but this can partly be mitigated by focusing on lower risk businesses such as retail banking, by leveraging our knowledge of our clients, and through exporting genuine capability that may be lacking in these developing markets. Additionally, with the increase in intra-Asia trade and economic activity, Asia now has less reliance on the US.

Our Approach…

Network businesses – we will to grow our “ANZ branded” network business in Asia, which is already one of the largest in the region. We will continue supporting trade flows in the region, supporting our Australian and New Zealand clients doing business in Asia, and supporting our Asian clients doing business in Australia and New Zealand. This business grew 45% last year.

Partnership businesses – we will invest in establishing retail and small business oriented partnerships with local banks with strong but under-leveraged franchises. We will provide support in their development with our well-recognised domestic and international banking expertise, to accelerate their growth and development. Key areas of management involvement are in are retail banking, small business, credit cards and risk management.

Some countries are unrestricted in their foreign shareholdings and this would permit us to have legal and management control. In most cases however, there are shareholding restrictions, which limit our shareholding, say to an initial 20%. This varies by country. In addition, domestic-owned banks tend to have full freedom whereas foreign-owned banks tend to operate with local restrictions. By partnering with local owners ANZ can participate more fully in these markets.

Also, ANZ is targeting joint-ventures in specialist areas such as credit cards where we can hold a higher share in the joint-venture, than in the partner.
ANZ’s Asia Strategy

Going Forward….

In terms of investing additional capital, our focus will be on the Partnerships business, where over the medium term we will look for further opportunities in existing countries with our partners, and in high population fast-growing developing countries. This could include further city investments in China, an increased investment in Indonesia, Vietnam or the Philippines, and new situations in countries such as Thailand. We are unlikely to invest in more developed markets such as Japan, Singapore, and Hong Kong, other than in Institutional.

As regulations relax we would also be willing to expand our shareholdings in our existing partnerships and work with them in local consolidation opportunities.

Over the medium-term, the higher growth rates in our Asia businesses could result in Asia being material to ANZ, and equivalent in the fullness of time to New Zealand in its contribution to ANZ.

Resource planning is central to the partnerships strategy

- ANZ has developed an extensive people strategy to provide resourcing to our partnerships
- ANZ has a large pool of executives to fill the required roles – senior resources are in place across all our existing partnerships
- ANZ has a number of initiatives underway to continue to grow and sustain our talent pool:
  - Succession plans in place for key roles
  - Growing talent bank of relevant, interested managers who want to work in partnerships
  - Recruitment of senior bankers of Asian origin and experience to work in Australia and New Zealand
  - Appointment of functional experts to the head office team to leverage and support in-country resources and prepare for assignments into partnerships
  - Recruitment of graduates - ANZ’s Australia/New Zealand graduate intake includes an increasing number of Asian language speakers
All partnerships have been resourced

**International Partnerships value-add**

**Tianjin City Commercial Bank**
- 6 ANZ executives and staff now operating within TCCB
- Initial focus on risk management, retail banking, trade finance, governance and IT

**Shanghai Rural Commercial Bank**

High levels of NPLs a key focus of due diligence and potential value creation

Majority of NPL’s Consumer Lending related

- Key focus throughout Due Diligence to be placed on NPL balances
- Significant improvement in NPLs in recent periods – reduced from 14% (Mar-05) to 9% (Sep-06) of Net Lending Assets
- Acquisition of MBf Finance in 2001 resulted in significant increase in NPLs, largely consumer related
- Consistent with existing partnerships, value creation anticipated through improving risk management lending & collection processes

*includes SME and Corporate Banking Lending
