

ANZ Bank New Zealand Limited

Update

Key Rating Drivers

Support Prospects: ANZ Bank New Zealand Limited's (ANZ) Shareholder Support Rating (SSR) and Long-Term Issuer Default Ratings (IDR) reflect Fitch Ratings' assessment of a very high likelihood of support from the bank's Australia-based owner, Australia and New Zealand Banking Group Limited (ANZ, AA-/Stable/a+), if required. The anchor rating for ANZ's SSR is ANZ's Viability Rating (VR) as it is unclear whether qualifying junior debt buffers being built by ANZ will be pre-placed or effectively available to support ANZ's senior creditors.

Integral Subsidiary: ANZ's SSR reflects its position as a key and integral part of ANZ, offering products and services in the group's core market, New Zealand. A sale would be very hard to conceive and would noticeably alter the overall shape of ANZ, while any default of ANZ would constitute a huge reputational risk for ANZ, damaging its franchise. Fitch expects the Australian and New Zealand banking regulators to allow support to flow as required.

Reduced Household Sector Risk: The operating environment score for New Zealand banks of 'a+/stable' reflects a sustained reduction in risks from the household sector over the last decade, due in part to a strengthened regulatory environment. However, household debt remains high relative to many other jurisdictions, and we maintain the score below the implied 'aa' category score to reflect this.

Market Position Underpins VR: ANZ's VR, which is in line with its implied VR, is supported by its large domestic market position. This allows for a simple business model, which underpins the financial profile. The 'a+' business profile score is above the implied 'bbb' category score to capture the strong market position. ANZ is New Zealand's largest bank, with a market share of more than 25% across loans and deposits.

Peak Stage 3 Loan Ratio in 2025: We expect ANZ's stage 3 loan/gross loan ratio to peak in 2025, as the full effect of rapid interest-rate hikes in 2021-2023 and increased unemployment put pressure on some borrowers' repayment capability.

Stable Profitability: We expect ANZ's operating profit/ risk-weighted assets (RWA) ratio to be relatively stable in the financial year ending 30 September 2025 (FY25), with a modest reduction in the net interest margin, driven by an easing rate cycle, offset by modest loan growth and cost control. Cost efficiency should remain strong, with the cost/income ratio likely to remain at 35%-40%.

Capitalisation to Improve: We expect the common equity Tier 1 (CET1) ratio to continue to rise towards 14% from the 12.6% reported at FYE24, as the bank builds towards final implementation of the new capital framework in mid-2028. The framework is more conservative than global rules, and we take this into consideration when assigning the factor score at 'a', above the implied 'bbb' category.

Broadly Stable Funding: We expect ANZ's deposit growth to broadly match loan growth over the next two years, resulting in a stable loans/customer deposits ratio. The loan/customer deposit ratio was 112% at FYE24. Liquidity is well managed, with the bank reporting regulatory liquidity ratios well in excess of minimum requirements.

Rating Sensitivities

Factors that Could, Individually or Collectively, Lead to Negative Rating Action/Downgrade

Long-Term IDRs and SSR

Any downgrade of ANZ's VR is likely to result in a downgrade of the SSR and Long-Term IDRs assigned to ANZNZ; see [Fitch Affirms Australia and New Zealand Banking Group at 'AA-'; Outlook Stable](#), published on 26 March 2025, for the key drivers and sensitivities of ANZ's VR.

The Long-Term IDRs and the SSR may also be downgraded should we change our view on ANZNZ's importance to ANZ. This could be reflected in a partial or full sale of ANZNZ or a decision to significantly scale back operations within New Zealand. Weakening co-operation between authorities in Australia and New Zealand may indicate a reduced ability for ANZ to provide support in a timely fashion, and put pressure on the ratings. However, neither of these scenarios is likely in our view.

VR

The VR could be downgraded if deterioration in the economic environment results in a combination of:

- The four-year average of the stage 3 loan/gross loan ratio increasing significantly above 1.5% (FY21-FY24: 0.7%) for a sustained period;
- The four-year average of the operating profit/RWA ratio falling consistently and significantly below 2.0% (FY21-FY24: 2.8%);
- The CET1 capital ratio declining below 10.5% without a credible plan to return to above this level (FY24: 12.6%).

Factors that Could, Individually or Collectively, Lead to Positive Rating Action/Upgrade

IDRs and SSR

An upgrade or revision of the Outlook on ANZ's IDRs would be likely to be reflected in ANZNZ's SSR and IDRs or the Outlook, as long as there is no change to ANZ's propensity to support ANZNZ and the action on ANZ's IDRs is driven by either its VR or GSR.

VR

An upgrade of the operating environment score for New Zealand banks to 'a+' – possibly to reflect reduced risks on household leverage within the system – would most likely be a prerequisite for an upgrade of ANZNZ's VR. An upgrade of the VR would also require that ANZNZ maintain its strong business profile in combination with a sustained improvement in its asset quality, capital and funding metrics.

Other Debt and Issuer Ratings

Rating Level	Rating	Outlook
Senior unsecured: long term	A+	n.a.
Senior unsecured: short term	F1	n.a.

Source: Fitch Ratings

ANZNZ's senior unsecured debt is rated in line with its IDRs, as per Fitch's *Bank Rating Criteria*.

Factors that Could, Individually or Collectively, Lead to Negative Rating Action/Downgrade:

Short-Term IDRs

ANZNZ's Short-Term IDRs may be downgraded if the Long-Term IDRs are downgraded to 'A-' or below.

Senior Unsecured

ANZNZ's senior unsecured debt ratings would be downgraded if its IDRs are downgraded.

Factors that Could, Individually or Collectively, Lead to Positive Rating Action/Upgrade:

Short-Term IDR

ANZNZ's Short-Term IDRs would be upgraded if the Long-Term IDRs are upgraded to 'AA-' or the parent's Funding and Liquidity score is raised to 'aa-'.

Senior Unsecured

ANZ's senior unsecured debt ratings would be upgraded if its IDRs are upgraded.

ANZNZ's IDRs, senior debt ratings and SSR reflect Fitch's assessment that there remains a very high probability of support from the Australian parent, ANZ, if required.

The IDRs are driven by the SSR, which is aligned with the Long-Term IDR of the parent, to reflect Fitch's assessment that ANZNZ remains a key and integral part of ANZ. New Zealand has been identified as a core market for ANZ, and ANZNZ is the only New Zealand-incorporated bank within the group. Another factor that supports alignment with the parent ratings is our view that an ANZNZ default would constitute huge reputational risk to ANZ and damage the group's franchise. In addition, we would expect cooperation between the Australian and New Zealand banking regulators on the stability of their financial systems to allow the required support to flow to the subsidiary.

Our Outlooks on ANZNZ's Long-Term IDRs reflect the Stable Outlook on ANZ's Long-Term IDR.

Subsidiaries and Affiliates

ANZ NZ issues foreign-currency wholesale funding through its wholly owned subsidiary, ANZ New Zealand (Int'l) Limited (ANZIL). ANZIL is used for funding purposes only and is not rated by Fitch; Fitch only rates the debt that it issues. The debt ratings are aligned with ANZ NZ's IDRs, as ANZ NZ guarantees ANZIL's senior unsecured debt instruments and the guarantee ranks pari passu with ANZ NZ's senior unsecured debt.

Factors that Could, Individually or Collectively, Lead to Negative Rating Action/Downgrade:

The ratings of the guaranteed instruments issued by ANZIL would be downgraded if ANZ NZ's IDRs are downgraded.

Factors that Could, Individually or Collectively, Lead to Positive Rating Action/Upgrade:

The ratings of the guaranteed instruments issued by ANZIL would be upgraded if ANZ NZ's IDRs are upgraded.

How to Read This Page

ESG relevance scores range from 1 to 5 based on a 15-level color gradation. Red (5) is most relevant to the credit rating and green (1) is least relevant.

The **Environmental (E), Social (S) and Governance (G)** tables break out the ESG general issues and the sector-specific issues that are most relevant to each industry group. Relevance scores are assigned to each sector-specific issue, signaling the credit-relevance of the sector-specific issues to the issuer's overall credit rating. The Criteria Reference column highlights the factor(s) within which the corresponding ESG issues are captured in Fitch's credit analysis. The vertical color bars are visualizations of the frequency of occurrence of the highest constituent relevance scores. They do not represent an aggregate of the relevance scores or aggregate ESG credit relevance.

The **Credit-Relevant ESG Derivation** table's far right column is a visualization of the frequency of occurrence of the highest ESG relevance scores across the combined E, S and G categories. The three columns to the left of ESG Relevance to Credit Rating summarize rating relevance and impact to credit from ESG issues. The box on the far left identifies any ESG Relevance Sub-factor issues that are drivers or potential drivers of the issuer's credit rating (corresponding with scores of 3, 4 or 5) and provides a brief explanation for the relevance score. All scores of '4' and '5' are assumed to reflect a negative impact unless indicated with a '+' sign for positive impact. Scores of 3, 4 or 5) and provides a brief explanation for the score.

Classification of ESG issues has been developed from Fitch's sector ratings criteria. The General Issues and Sector-Specific Issues draw on the classification standards published by the United Nations Principles for Responsible Investing (PRI), the Sustainability Accounting Standards Board (SASB), and the World Bank.

CREDIT-RELEVANT ESG SCALE

How relevant are E, S and G issues to the overall credit rating?

5	Highly relevant, a key rating driver that has a significant impact on the rating on an individual basis. Equivalent to "higher" relative importance within Navigator.
4	Relevant to rating, not a key rating driver but has an impact on the rating in combination with other factors. Equivalent to "moderate" relative importance within Navigator.
3	Minimally relevant to rating, either very low impact or actively managed in a way that results in no impact on the entity rating. Equivalent to "lower" relative importance within Navigator.
2	Irrelevant to the entity rating but relevant to the sector.
1	Irrelevant to the entity rating and irrelevant to the sector.

The highest level of ESG credit relevance is a score of '3', unless otherwise disclosed in this section. A score of '3' means ESG issues are credit-neutral or have only a minimal credit impact on the entity, either due to their nature or the way in which they are being managed by the entity. Fitch's ESG Relevance Scores are not inputs in the rating process; they are an observation on the relevance and materiality of ESG factors in the rating decision. In issuing and maintaining its ratings and in making other reports (including forecast information), Fitch relies on factual information it receives from issuers and underwriters and from other sources Fitch believes to be credible. Fitch conducts a reasonable investigation of the factual information relied upon by it in accordance with its ratings methodology, and obtains reasonable verification of that information from independent sources, to the extent such sources are available for a given security or in a given jurisdiction. The manner of Fitch's factual investigation and the scope of the third-party verification it obtains will vary depending on the nature of the rated security and its issuer, the requirements and practices in the jurisdiction in which the rated security is offered and sold and/or the issuer is located, the availability and nature of relevant public information, access to the management of the issuer and its advisers, the availability of pre-existing third-party verifications such as audit reports, agreed-upon procedures letters, appraisals, actuarial reports, engineering reports, legal opinions and other reports provided by third parties, the availability of independent and competent third-party verification sources with respect to the particular security or in the particular jurisdiction of the issuer, and a variety of other factors. Users of Fitch's ratings and reports should understand that neither an enhanced factual investigation nor any third-party verification can ensure that all of the information Fitch relies on in connection with a rating or a report will be accurate and complete. Ultimately, the issuer and its advisers are responsible for the accuracy of the information they provide to Fitch and to the market in offering documents and other reports. In issuing its ratings and its reports, Fitch must rely on the work of experts, including independent auditors with respect to financial statements and attorneys with respect to legal and tax matters. Further, ratings and forecasts of financial and other information are inherently forward-looking and embody assumptions and predictions about future events that by their nature cannot be verified as facts. As a result, despite any verification of current facts, ratings and forecasts can be affected by future events or conditions that were not anticipated at the time a rating or forecast was issued or affirmed. Fitch Ratings makes routine, commonly-accepted adjustments to reported financial data in accordance with the relevant criteria and/or industry standards to provide financial metric consistency for entities in the same sector or asset class.

A Fitch rating is an opinion as to the creditworthiness of a security. This opinion and reports made by Fitch are based on established criteria and methodologies that Fitch is continuously evaluating and updating. Therefore, ratings and reports are the collective work product of Fitch and no individual, or group of individuals, is solely responsible for a rating or a report. The rating does not address the risk of loss due to risks other than credit risk, unless such risk is specifically mentioned. Fitch is not engaged in the offer or sale of any security. All Fitch reports have shared authorship. Individuals identified in a Fitch report were involved in, but are not solely responsible for, the opinions stated therein. The individuals are named for contact purposes only. A report providing a Fitch rating is neither a prospectus nor a substitute for the information assembled, verified and presented to investors by the issuer and its agents in connection with the sale of the securities. Ratings are not a recommendation to buy, sell, or hold any security. Ratings do not comment on the adequacy of market price, the suitability of any security for a particular investor, or the tax-exempt nature or taxability of payments made in respect to any security. Fitch receives fees from issuers, insurers, guarantors, other obligors, and underwriters for rating securities. Such fees generally vary from US\$1,000 to US\$750,000 (or the applicable currency equivalent) per issue. In certain cases, Fitch will rate all or a number of issues issued by a particular issuer, or insured or guaranteed by a particular insurer or guarantor, for a single annual fee. Such fees are expected to vary from US\$10,000 to US\$1,500,000 (or the applicable currency equivalent). The assignment, publication, or dissemination of a rating by Fitch shall not constitute a consent by Fitch to use its name as an expert in connection with any registration statement filed under the United States securities laws, the Financial Services and Markets Act of 2000 of the United Kingdom, or the securities laws of any particular jurisdiction.
