OVERVIEW

FIRST QUARTER FY2022 (PERIOD ENDED 31 DECEMBER 2021)

Net Interest Margin (Page 3)

- Group Net Interest Margin was down 8bps for the quarter with underlying NIM down 5bps (in each case, compared with the FY21 second half), largely driven by a lower exit rate at the FY21 full year (versus the FY21 second half average) and a continuation of the structural headwinds impacting the sector
- The impact of rising rates, predominantly in New Zealand, and recent deposit pricing changes are expected to moderate these ongoing headwinds in the second quarter

Capital (Page 4)

- The Group's Common Equity Tier One ratio of 11.65% includes the impact of the final dividend and solid underlying credit growth in Institutional
- ANZ announced a \$1.5b On Market Buy Back in July 2021 and as at 31 January 2022, had bought back \$1.015b of Ordinary Shares (\$0.9b as at 31 December 2021)

Credit Quality and Balance Sheet Movement (first quarter) (Pages 5-10)

- The credit quality environment has remained benign with a total provision release of \$44m during the quarter. This comprises a collective provision release of \$122m and an individually assessed provision of \$78m. 1Q22 annualised individual provision loss rate was 5bps
- Risk Weighted Assets increased 4% in 1Q22, largely driven by increased Credit Risk Weighted Assets (CRWA) in Institutional. Growth was two thirds corporate business and one third FIG with corporate CRWA reflecting increased demand for infrastructure assets from both acquisition activity and investment

Australian Mortgage Portfolio (Page 11)

- ANZ has made solid progress in Australia to improve systems and processes for simple home loans with application times now in line with other major lenders. Efforts continue to improve response times for more complex home loan applications
- Australian Home Loans balance sheet grew slightly in 1Q22. Given the high levels of refinancing activity in the sector, managing both attrition and margins remain key areas of focus

Institutional Markets Business

- Revenue within ANZ's Markets business for the month of October was softer given trading conditions. While subsequent months have performed more in line with FY21 revenue trends, the softer start in October will likely impact First Half performance

Australia Retail & Commercial Product Change

- Changes ANZ is making to packages offered within its Australia Retail & Commercial business from March 2022 will provide customers with simpler and lower fee options
- While better aligned to positive customer outcomes, the changes will have a negative transitional impact on other operating income in FY22 of ~\$140m, spread evenly across the two halves

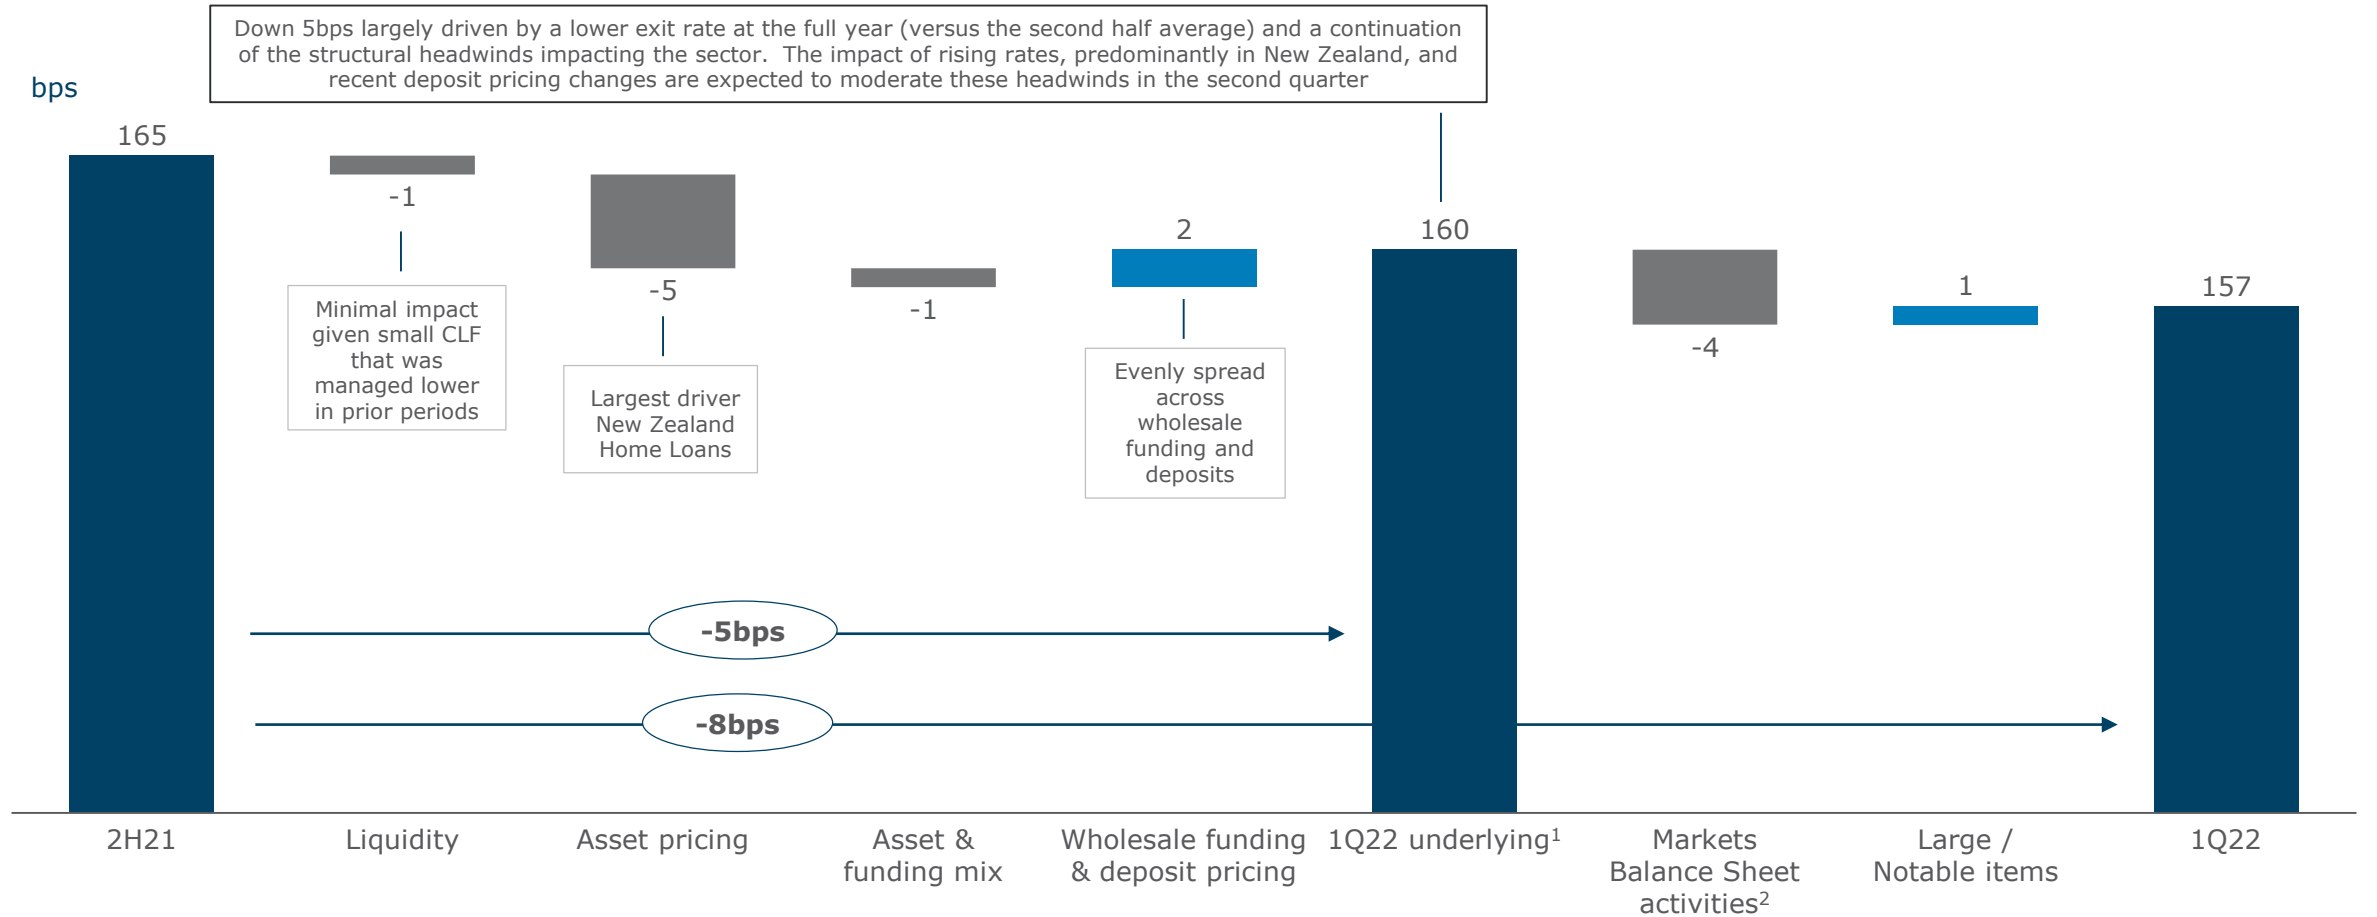

Expenses

- Run-the-bank costs¹ are expected to be broadly flat in the first half with investment spend higher as we invest in our business at a faster rate, particularly within Australia Retail and Commercial and ANZx, as well as expensing investment at a higher rate than FY21 (FY21: 79%; 1Q22: 89%)

1. Excludes the impact of foreign currency translation and the acquisition of Cash Rewards

GROUP NET INTEREST MARGIN (NIM)

CONTINUING OPERATIONS
