

2022 Basel III Pillar 3 Disclosure

As at 30 September 2022

APS 330: Disclosures for the
identification of potential G-SIB'S

Important notice

This document has been prepared by Australia and New Zealand Banking Group Limited (ANZ) to meet its disclosure obligations under the Australian Prudential Regulation Authority (APRA) ADI Prudential Standard (APS) 330: Public Disclosure.

Table 22 Disclosures for the identification of potential G-SIBs

Every year, a sample of international banks must provide information to the Basel Committee for Banking Supervision (BCBS) for assessment against a set of indicators that identify potential Global Systemically Important Banks (G-SIBs). Banks above a cut-off score are identified as G-SIBs and are subject to higher loss absorbency (HLA) capital requirement and G-SIB Pillar 3 disclosures. No Australian bank has been classified as a G-SIB, however Australia and New Zealand Banking Group Limited, Commonwealth Bank of Australia, National Australia Bank Limited and Westpac Banking Corporation Limited have been designated as Domestic Systemically Important Banks (D-SIB) by APRA and are required to hold an additional 1% HLA buffer and to publish their G-SIB indicators by 31 July following the relevant reporting date. ANZ's most recent reporting date was 30 September 2022, therefore the public disclosure of this information is due by 31 July 2023. The table below shows the twelve indicators that are used to identify potential G-SIBs as required in APS 330, using information as at 30 September 2022. More information about the G-SIB score calculation can be found at website www.bis.org/bcbs/gsib/.
