## Financial Report

### Notes to the Financial Statements

#### for the financial year ended 30 June 2019

#### 9. Financial risk management

##### 9.1 Introduction and overview

The Schemes are exposed to a variety of financial risks from investments in financial instruments. These risks include:

- credit risk
- liquidity risk
- market risk

This note presents information about the Schemes' exposure to each of the above risks, the Schemes' objectives, policies and processes for measuring and managing risks, and the Schemes' management of unitholder funds.

##### 9.1.1 Risk management framework

The Schemes maintain positions in a variety of derivative and non-derivative financial instruments in accordance with the PDSs or investment mandates. During the year the Schemes' investment portfolios comprise cash, derivatives and unit trusts.

The Schemes' investment managers have been given a discretionary authority to manage the assets in line with the Schemes' investment objectives. Compliance with the target asset allocations and the composition of the portfolio is monitored on a daily basis. In instances where the portfolio has diverged from target asset allocations, the investment managers are obliged to take action to rebalance the portfolio in line with the established targets, within prescribed time limits.

##### 9.2 Credit risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Schemes, resulting in a financial loss to the Schemes. It arises from derivative financial assets and cash and cash equivalents.

##### 9.2.1 Management of credit risk

The Schemes' policy over credit risk is to minimise its exposure to counterparties with higher risk of default by dealing only with counterparties meeting the credit standards set out in the Schemes' PDSs and by taking collateral. Credit risk is further minimised by managing the assets of the Schemes within credit rating limits.

Credit risk is monitored by the investment managers in accordance with the policies and procedures in place, including assessing the credit rating and quality of interest bearing instruments relative to their price and yield.

##### 9.2.2 Derivative financial instruments

The Schemes may enter into two types of derivative transactions: exchange-traded derivatives and over-the-counter (OTC) derivatives. Credit risk arising from exchange-traded derivatives is mitigated by margin requirements. OTC derivatives expose the Schemes to the risk that the counterparties to the derivative financial instruments might default on their obligations to the Schemes.

Derivative financial instruments are transacted with counterparties on arm's length basis and within predetermined limits.

The fair value of the over-the-counter derivative assets held by the Schemes is disclosed in Note 9.2.6 Credit risk exposure.

##### 9.2.3 Cash and cash equivalents

The Schemes' cash and cash equivalents are held mainly by Australia and New Zealand Banking Group Limited (ANZ) or JPMorgan Chase Bank, N.A. (Sydney Branch). The credit rating of these banking institutions as determined by Standard & Poor's are A-1+ (2018: A-1+) and A-1 (2018: A-1), respectively, as at reporting date. Maximum credit risk exposure from cash and cash equivalents is represented by the carrying amount on the Statements of Financial Position.

**Financial Report**  
**Notes to the Financial Statements**  
**for the financial year ended 30 June 2019**

**9.2.4 Settlement risk**

The Schemes' activities may give rise to risk at the time of settlement of transactions. Settlement risk is the risk of loss due to the failure of an entity to honour its obligations to deliver cash, securities or other assets as contractually agreed.

**9.2.5 Past due and impaired assets**

No financial assets carried at amortised cost were past due or impaired either at 30 June 2019 or 30 June 2018.

**9.2.6 Credit risk exposure**

The Schemes' maximum credit risk exposure (without taking into account collateral and other credit enhancements) is represented by the respective carrying amounts of the relevant financial securities in the Statements of Financial Position at reporting date.

The tables below detail the maximum exposure to credit risk for the assets held by the Schemes. The derivatives held by the Schemes included in the below tables are foreign currency forward contracts which are OTC derivatives.

**Financial Report**  
**Notes to the Financial Statements**  
**for the financial year ended 30 June 2019**

**9.2.7 Offsetting financial assets and financial liabilities**

Financial assets and liabilities are offset and the net amount reported in the Statements of Financial Position when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or realise the asset and settle the liability simultaneously. The gross and net positions of foreign currency forward contracts that have been offset in the Statements of Financial Position are disclosed in the following tables:

The Schemes did not have any arrangement that significantly reduces the credit risk associated with financial assets not offset against financial liabilities with the same counterparty.

**9.3 Liquidity risk**

Liquidity risk is the risk that the Schemes will encounter difficulty in meeting obligations arising from their financial liabilities that are settled by delivering cash or another financial asset, or that such obligations will have to be settled in a manner disadvantageous to the Schemes.

**9.3.1 Management of liquidity risk**

The Schemes' policy and the investment managers' approaches to managing liquidity is to have sufficient liquidity to meet their liabilities, including estimated redemptions of units, as and when they fall due, without incurring undue losses.

The Schemes' PDSs allow for the daily creation and cancellation of units and they are therefore exposed to the liquidity risk of meeting unitholder redemptions at each redemption date.

The Schemes hold investments in unlisted unit trusts, which may be subject to redemption restrictions. As a result, the Schemes may not be able to liquidate some of their investments in these instruments in due time in order to meet their liquidity requirements.

The Schemes' liquidity risk is managed on a daily basis and the investment managers' approaches are in accordance with their investment mandates. Daily monitoring of cash flow and liquidity levels is conducted to ensure appropriate and timely action which is in the best interests of the unitholders. In addition to monitoring daily cash flows, the Schemes' portfolio of assets are maintained within defined mandate limits and monitoring these positions is part of liquidity risk management.

**Financial Report**  
**Notes to the Financial Statements**  
**for the financial year ended 30 June 2019****9.4 Market risk**

Market risk is the risk that changes in market prices, such as interest rates, equity prices, foreign exchange rates and credit spreads (not relating to changes in the obligor's/issuer's credit standing), will affect the Schemes' income or the fair value of their holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return.

**9.4.1 Management of market risk**

The Schemes' strategy for the management of market risk is driven by each Scheme's investment objectives. The Schemes' market risk is managed on a daily basis by the investment managers in accordance with the investment guidelines of each Scheme's investment mandates.

The Schemes may use derivatives to manage their exposure to foreign currency, interest rate and other price risks. The instruments used include forward contracts and futures. The Schemes do not apply hedge accounting.

**9.4.2 Interest rate risk**

The Schemes are exposed to the risk that the fair value or future cash flows of their financial instruments will fluctuate as a result of changes in market interest rates. Financial instruments that would be impacted by changes in market interest rates include cash and cash equivalents, interest rate futures, long term loans and deposits with brokers.

The Schemes' interest rate risk is managed on a daily basis by the investment managers in accordance with the defined investment process and within the guidelines and restrictions outlined in the Schemes' investment mandates.

The Schemes are monitored for mandate compliance. Where the interest rate risk exposure moves outside the Schemes' mandate restrictions or guidelines, the investment managers will rebalance the portfolios.

**9.4.3 Exposure and sensitivity analysis - interest rate risk**

Direct interest rate risk exposure at the reporting date is disclosed in Note 9.4.4 Interest rate risk exposure and sensitivity analysis.

A sensitivity analysis reflects how 'Net assets attributable to unitholders' and 'Profit/(loss) for the financial year/Total comprehensive income' would have been affected by changes in the relevant risk at the end of the reporting period. Management have determined that a fluctuation in interest rates of 50 basis points is reasonably possible, considering the economic environment in which the Schemes operate.

The tables at Note 9.4.4 Interest rate risk exposure and sensitivity analysis set out the effect on the Schemes' 'Net assets attributable to unitholders' and 'Change in net assets attributable to unitholders/Total comprehensive income' of a reasonably possible increase or reduction of 50 basis points in interest rates at 30 June 2019 (2018: 50 basis points).

#### 9.4.5 Currency risk

The Schemes invest in financial instruments and may enter into transactions that are denominated in currencies other than their functional currency. Consequently, the Schemes are exposed to risk that the exchange rate of their currency relative to other foreign currencies may change in a manner that has an adverse effect on the fair value or future cash flows of that portion of the Schemes' financial assets or liabilities denominated in currencies other than the Australian dollar.

The Schemes' currency risk is actively managed on a regular basis by the investment managers in accordance with its defined currency management process, and within the guidelines and constraints of the Schemes' investment mandates in order to enhance total returns. The investment managers may use derivative contracts such as options, futures, swaps and forward contracts as permitted by the mandates in managing currency risk.

#### 9.4.6 Exposure and sensitivity analysis - currency risk

The Schemes' total net direct exposure to fluctuations in foreign currency exchange rates as at the reporting date is shown in Note 9.4.7 Currency risk exposure and sensitivity analysis.

A sensitivity analysis reflects how 'Net assets attributable to unitholders' and 'Profit/(loss) for the financial year/Total comprehensive income' would have been affected by changes in the relevant risk at the end of the reporting period. Management has determined that a movement in the Australian dollar of 10% is reasonably possible, considering the current economic environment in which the Schemes operate.

The tables at Note 9.4.7 Currency risk exposure and sensitivity analysis set out the effect on the Schemes' 'Net assets attributable to unitholders' and the 'Change in net assets attributable to unitholders/Total comprehensive income' of a possible strengthening or weakening of the Australian dollar of 10% as at 30 June 2019 (2018 10%).

**Financial Report**  
**Notes to the Financial Statements**  
**for the financial year ended 30 June 2019**

**9.4.8 Other price risk**

At the reporting date other price risk is the risk that the fair value of the financial instrument will fluctuate as a result of changes in market prices (other than those arising from interest rate risk or currency risk), whether caused by factors specific to an individual investment, its issuer or factors affecting all instruments traded in the market. Other price risk is managed by the investment managers by diversifying the portfolio and economically hedging using derivative financial instruments such as future contracts, in accordance with the PDSs or information memorandum.

The Schemes' financial instruments which are carried at fair value have any change in the fair value of investments recognised in the Statements of Comprehensive Income in the line item 'Net change in fair value of investments'.

**9.4.9 Exposure and Sensitivity analysis - other price risk**

The other price risk exposure of financial instruments is equal to the fair value of financial instruments as reported in the Statements of Financial Position and in Note 6 Financial assets and liabilities.

A sensitivity analysis reflects how 'Net assets attributable to unitholders' and 'Profit/(loss) for the financial year/Total comprehensive income' would have been affected by changes in the relevant risk at the end of the reporting period.

Management has determined that a movement in market prices of 10% is possible, considering the economic environment in which the Schemes operate.

The tables at Note 9.4.10 Other price risk - sensitivity analysis set out the effect on the Schemes' 'Net assets attributable to unitholders' and 'Profit/(loss) for the financial year/Total comprehensive income' of a possible increase or decrease in market prices of 10% (2018 10%).

**Financial Report**  
**Notes to the Financial Statements**  
**for the financial year ended 30 June 2019**

**9.5 Valuation of financial instruments**

The Schemes' accounting policy on fair value measurement is discussed in Note 3.2.5 Fair value measurement principles.

The Schemes measure financial assets and financial liabilities held at fair value through profit or loss using the following fair value hierarchy:

**Level 1** - Quoted price (unadjusted) in an active market for an identical instrument.

The quoted market price used for financial assets is the current bid price. The quoted market price used for financial liabilities is the current ask price.

**Level 2** - Valuation techniques based on observable inputs, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

This category includes instruments valued using: quoted prices in active markets for similar instruments; quoted prices for identical or similar instruments in markets that are considered less than active; or other valuation techniques for which all significant inputs are directly or indirectly observable from market data.

**Level 3** - Valuation techniques using significant unobservable inputs.

This category includes all instruments that use a valuation technique which includes inputs not based on observable data and the unobservable inputs have a significant effect on the instruments valuation. This category includes instruments that are valued based on quoted prices for similar instruments for which significant unobservable adjustments or assumptions are required to reflect differences between the instruments.

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a Level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the asset or liability.

The determination of what constitutes 'observable' requires significant judgement by the Responsible Entity. The Responsible Entity considers observable data to be market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

The valuation of managed investment schemes included in Level 2 and Level 3 is based on the daily net asset value of the managed investment scheme provided by the relevant Responsible Entities.

Level 2 fair values for simple, over the counter derivative financial instruments are based on broker quotes. Those quotes are tested for reasonableness by discounting expected future cash flows using a market interest rate for a similar instrument at the measurement date. Fair values reflect the credit risk of the instrument and include an adjustment to take account of the credit risk of the Schemes and counterparty where appropriate.

The Schemes recognise transfers between levels of the fair value hierarchy as of the end of the reporting period during which the transfer has occurred. Changes in Level 2 and 3 fair values are analysed at each reporting date and the reasons for the fair value movements are explained. There were no transfers between Level 1, Level 2 and Level 3 of the fair value hierarchy during the financial year ended 30 June 2019.

**Notes to the Financial Statements**  
**for the financial year ended 30 June 2019**

**9.5.2 Movements of Level 3 securities**

Level 3 securities held are securities valued by using inputs not derived from observable market data. Inputs are prices derived from external sources which use various valuation techniques that include unobservable inputs. Transfers are considered when the underlying conditions of the financial instruments change.

The following tables detail a reconciliation of opening balances to the closing balances for fair value measurements in Level 3 of the fair value hierarchy:

<sup>†</sup> The Scheme invested into the Mortgage Pool, a suspended unlisted unit trust which was valued at zero at the comparative year end. The suspended unlisted unit trust was classified as Level 3 in the fair value hierarchy in the comparative year. During the current year, the Mortgage Pool was revalued and the Scheme redeemed its units in the Mortgage Pool. Refer to Note 16 Significant events during the financial period for further detail.

There were no significant inter-relationships between unobservable inputs that materially affect fair values.

**9.5.4 Level 3 sensitivity analysis of unobservable inputs**

Although the Responsible Entity of the Schemes believe that its estimates of fair value are appropriate, the use of different methodologies or assumptions could lead to different measurements of fair value. For fair value measurements in Level 3, changing one or more of the assumptions used as reasonably possible alternative assumptions by 10% upwards (favourable) or downwards (unfavourable) would have the following effects on profit or loss:

The above tables list the fair value and the percentage exposure to each investment asset as at 30 June 2019. The exposure has been classified at the underlying asset level of each unconsolidated structured entity. The maximum exposure to loss is limited to the fair value of each investment asset as at 30 June 2019. The fair value of the exposure will change on a daily basis throughout the period and in subsequent periods and will cease once the investments are disposed.

The investments of the Schemes are managed in accordance with the investment mandates with the respective underlying investment managers. The investment decisions of the Schemes are made by the investment managers based on their analysis. The return of the Schemes is exposed to the variability of the performance of the underlying investment assets. The underlying investment managers receive a management fee for undertaking the management of these investments.

19. ANZ OA OnePath Income Trust

As at 30 June 2019, ANZ OA OnePath Income Trust held 0% (2018: 0.56%) of total units of the Mortgage Pool. The Mortgage Pool is a suspended managed investment scheme managed by OnePath Funds Management Limited which had a zero unit price at the comparative year end. In the current year, the unit price of Mortgage Pool was revalued and the Scheme redeemed its units in the Mortgage Pool. Refer to Note 16 Significant events during the financial period for further detail.

**16. Significant events during the financial period**

Name changes of Schemes:

During the financial year, the following Schemes had their names changed as indicated in the following table:

| <b>Previous name of Scheme</b>                       | <b>New name of Scheme</b>                          |
|------------------------------------------------------|----------------------------------------------------|

| OneAnswer - BR Balanced Trust                        | OneAnswer - Blackrock Tactical Growth Trust        |
| OneAnswer - BT Wholesale Core Australian Share Trust | OneAnswer - Pandal Australian Share Trust          |
| OneAnswer - BT Core Hedged Global Shares Trust       | OneAnswer - Pandal Core Hedged Global Shares Trust |
| OneAnswer - BT Monthly Income Plus Trust             | OneAnswer - Pandal Monthly Income Plus Trust       |
| OneAnswer - BT Smaller Companies Trust               | OneAnswer - Pandal Smaller Companies Trust         |
| OnePath Diversified High Yield Trust                 | OnePath Diversified Credit Trust                   |

The name changes listed above were the result of name change of the external fund manager or aligning the investment objectives and the nature of assets held within the Schemes.

This significant event occurred at the Scheme level and did not impact individual unitholder balances or units.

OnePath Life Limited redemption:

During April 2019, OnePath Life Limited (OPL), a significant unitholder and related party of Australia and New Zealand Banking Group Limited (ANZ) until 31 May 2019, redeemed certain units within the Schemes. Redeemed units were transferred to Retirement Portfolio Service (RPS), for which OnePath Custodians Pty Limited (a related party of ANZ) is the Trustee. Refer to Note 8.2 Non-cash financing activities, Note 11.6 Units in the Schemes held by related parties and Note 11.6.1 OnePath Life Limited redemption for further detail.

The transfer of units did not impact the investments of the Schemes that are still managed by OnePath Funds Management Limited. As a result, this change had no impact on either the total units issued by the Schemes or the units held by individual unitholders other than OPL and RPS.

Proposed sale of OnePath P&I business:

On 17 October 2017, Australia and New Zealand Banking Group Limited (ANZ), the ultimate parent company of OnePath Funds Management Limited (the Responsible Entity of the Schemes) announced the proposed sale of the OnePath Pension and Investments (OnePath P&I) business to IOOF Holdings Limited and Australian Wealth Management Limited (IOOF).

On 7 December 2018, the Australian Prudential Regulation Authority (APRA) announced regulatory action against IOOF. As at the reporting date, ANZ and OnePath Custodians Pty Limited (a related party of ANZ) continue to engage with IOOF to understand the actions IOOF are taking to respond to the APRA matter. OPFM continues to operate the Schemes within ANZ and there have been no changes to the operations of the Schemes.

19. ANZ OA OnePath Income Trust

The Scheme invested into the Mortgage Pool, a suspended unlisted unit trust which had a zero unit price in prior financial year. Outstanding litigation on a past loan within the Mortgage Pool investment has been resolved in the current year and as a result, the unit price of Mortgage Pool was revalued.

On 3 June 2019, the Scheme redeemed its units in the Mortgage Pool. As at the reporting date, the Scheme no longer invests into the Mortgage Pool.

**17. Likely developments and expected results of operations**

The Schemes will continue to pursue their investment policies as outlined in the PDSs or investment mandates. The results of the Schemes will be affected by a number of factors, including the performance of investment markets in which the Schemes invest. Investment performance is not guaranteed and future returns may differ from past returns. As investment conditions change over time, past returns should not be used to predict future returns.

Further information has not been included in this report to avoid the disclosure of information that may result in unreasonable prejudice to the Schemes.

For the purpose of this report, the term Scheme and Schemes denote the individual and distinct entity for which the financial information is prepared and upon which our audit is performed. Each is to be read as a singular subject matter.

### Opinions

We have audited each of the **Financial Reports** of the Schemes.

In our opinion, the accompanying Financial Report of each Scheme is in accordance with the *Corporations Act 2001*, including:

- giving a true and fair view of the Scheme's financial position as at 30 June 2019 and of its financial performance for the year ended on that date; and
- complying with *Australian Accounting Standards* and the *Corporations Regulations 2001*.

The respective **Financial Reports** of the individual Schemes comprise:

- Statement of Financial Position as at 30 June 2019;
- Statement of Comprehensive Income for the year then ended;
- Statement of Changes in Equity for the year then ended;
- Statement of Cash Flows for the year then ended;
- Notes including a summary of significant accounting policies; and
- Directors' Declaration made by the Directors of OnePath Funds Management Limited (the Responsible Entity).

The *financial year* is the 12 months ended on 30 June 2019.

## Independent Auditor's Report

### Basis for opinions

We conducted our audits in accordance with *Australian Auditing Standards*. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinions.

Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audits of the Financial Reports* section of our report.

We are independent of the Schemes and the Responsible Entity in accordance with the *Corporations Act 2001* and the ethical requirements of the *Accounting Professional and Ethical Standards Board's APES 110 Code of Ethics for Professional Accountants* (the Code) that are relevant to our audits of the Financial Reports in Australia. We have fulfilled our other ethical responsibilities in accordance with the Code.

### Other Information

Other Information is financial and non-financial information in the issuer of the respective Schemes' annual reporting which is provided in addition to the Financial Reports and the Auditor's Report. The Directors of the Responsible Entity are responsible for the Other Information.

Our opinions on the Financial Reports do not cover the Other Information and, accordingly, we do not and will not express an audit opinion or any form of assurance conclusion thereon.

In connection with our audits of the Financial Reports, our responsibility is to read the Other Information. In doing so, we consider whether the Other Information is materially inconsistent with the Financial Reports or our knowledge obtained in the audits, or otherwise appears to be materially misstated.

We are required to report if we conclude that there is a material misstatement of this Other Information, and based on the work we have performed on the Other Information that we obtained prior to the date of this Auditor's Report we have nothing to report.

### Responsibilities of the Directors for the Financial Reports

The Directors of the Responsible Entity are responsible for:

- preparing the Financial Reports that give a true and fair view in accordance with *Australian Accounting Standards* and the *Corporations Act 2001*;
- implementing necessary internal control to enable the preparation of a Financial Report that gives a true and fair view and is free from material misstatement, whether due to fraud or error; and
- assessing each Scheme's ability to continue as a going concern and whether the use of the going concern basis of accounting is appropriate. This includes disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless they either intend to liquidate the respective Scheme or to cease operations, or have no realistic alternative but to do so.

### Auditor's responsibilities for the audits of the Financial Reports

Our objective is:

- to obtain reasonable assurance about whether each of the Financial Reports as a whole is free from material misstatement, whether due to fraud or error; and
- to issue an Auditor's Report that includes our opinions.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with *Australian Auditing Standards* will always detect a material misstatement when it exists.

Misstatements can arise from fraud or error. They are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the Financial Reports.

A further description of our responsibilities for the audits of the Financial Reports is located at the Auditing and Assurance Standards Board website at:

[http://www.auasb.gov.au/auditors\\_responsibilities/ar4.pdf](http://www.auasb.gov.au/auditors_responsibilities/ar4.pdf). This description forms part of our Auditor's Report.

I declare that, to the best of my knowledge and belief, in relation to each of the audits of the Schemes for the financial year ended 30 June 2019 there have been:

- i. no contraventions of the auditor independence requirements as set out in the *Corporations Act 2001* in relation to each audit; and
- ii. no contraventions of any applicable code of professional conduct in relation to each audit.
